

AQL 2019

The International Conference on Advances in Quantitative Laryngology, Voice and Speech Research (AQL) provides a unique opportunity for partnership and collaboration in the advancement of quantitative methods for the measurement and modelling of voice and speech. The AQL accomplishes this mandate by facilitating interprofessional scientific conference and training intended for an international community of otolaryngologists, speech-language pathologists and voice scientists. With a continued drive toward advancements in translational and clinical voice science, the AQL has rapidly expanded over the past 20 years, from a forum of 15 European member-laboratories to a globally recognized symposium, connecting over 100 delegates from across the world.
